

WELCOME TO OUR WEBSITE!

Inner Solutions for Success (ISS) is devoted to providing a variety of behaviorally-oriented educational, consultation and coaching services to healthcare providers and organizations. Our goal is to empower healthcare providers and organizations to obtain excellence by making enduring changes from the inside out!

We are proud to have developed the premier educational training program in professional boundaries, specifically designed to meet the unique needs of physicians and other healthcare providers. Our **Professional Boundaries Program** is nationally recognized as a program of excellence in helping physicians reduce their risk of professional boundary violations. Our psycho educational program is supportive and includes individual coaching to help insure success in professional boundary maintenance.

As a dynamic and experienced multidisciplinary team, we also understand that the world of medicine is demanding and stressful, even under the best of circumstances! Inner Solutions for Success has several educational workshops and training programs to help reduce stress, improve coping, and enhance skills and performance within the field of medicine. Our **Stress, Coping and Communication** training program is designed for the physician who has been identified as 'disruptive' or whose career goals are in jeopardy due to maladaptive coping or other behavioral problems. Don't let the label of 'disruptive physician' effect patient care, impact staff morale and turn-over, ruin distinguished careers, or create serious problems for hospital management. Support and training is available in a positive, confidential and non-threatening environment.

Inner Solutions for Success also offers a **Healthcare, Education and Leadership Program (H.E.L.P.)**: a variety of **organizational consultation** services to meet the specific needs of healthcare organizations, including **Leadership Training** and **Executive Coaching**. All of our educational training programs can be modified to meet the specific needs of your healthcare team or facility. **Our mission is to improve the quality of patient care by helping the providers and organizations who deliver patient care!**
